Chief Technology Officer | Hybrid Cloud & Infrastructure Modernization Leader

EXECUTIVE SUMMARY

I am an enterprise Chief Technology Officer with over 20 years of progressive leadership experience, overseeing technology strategy, architecture, and infrastructure operations across a \$1.5B multi-division organization. I am a proven builder and stabilizer of legacy environments, architecting resilient hybrid cloud ecosystems and enterprise network architecture while leading lean technical teams through modernization and operational change. I am seeking a mid-market leadership role with clear authority, strong executive alignment, and hands-on impact.

CHIEF TECHNOLOGY OFFICER | Superior Livestock Auction | Hudson Oaks, TX

- Lead enterprise-wide technology architecture and infrastructure operations across multiple business segments and two subsidiary companies.
 - Architected and developed hybrid cloud environment (AWS + on-premises), supporting live broadcast, webcast, and other mission-critical operations.
 - Designed high-availability infrastructure, integrating cloud services with multi-site enterprise networking, segmentation, and secure remote connectivity.
 - Directed and implemented enterprise network architecture, including routing strategy, site-to-site connectivity, segmentation, and broadcast-integrated systems.
 - Stabilized and restructured inherited legacy systems, improving infrastructure resiliency and operational continuity.
 - Served as enterprise systems architect, designing, operating, and modernizing hybrid cloud infrastructure and CI/CD pipelines supporting application development initiatives.
 - Led enterprise broadcast and streaming infrastructure, delivering over 1,500 annual hours of nationwide auction events across multiple business segments and subsidiaries with zero downtime, modernizing workflows into a highly automated and scalable production platform.
 - Consolidated infrastructure, networking, and systems responsibilities during organizational restructuring while maintaining uninterrupted service delivery.
 - Managed enterprise cloud footprint (~\$100K annual spend) with focus on performance optimization, cost efficiency, and operational resiliency.
-

CORE CAPABILITIES

Hybrid Cloud Architecture (AWS) | Enterprise Network Architecture | High-Availability Systems Design
Infrastructure Modernization | DevOps & Automation | Operational Stabilization
Technology Roadmap Execution
